

Federal Investigative Unit—Department of Energy Security (DES)

Level 4—Internal Use Only

FILE 06: HARTLEY, DR. MARISSA ELAINE

STATUS: ALIVE

DOB: 03 February 1984

Occupation: Director of Artificial Intelligence Research, SolGen Technologies

Education: Ph.D. Computer Science (University of Cambridge)

Marital Status: Single

Children: N/A

Address: 1821 Montclair Avenue, Palo Alto, CA

BEHAVIORAL NOTES:

- Extremely private; limited public presence.
- Known to suffer from insomnia and stress-related symptoms during final testing phase.
- Described by subordinates as "brilliant but detached."

ADDITIONAL INFORMATION:

Dr. Hartley led the Apollo neural network development for Project Helios, overseeing AI data integration from thousands of sensor nodes. Recovered emails between Hartley and Wren show early cooperation but later tension after Wren questioned the nature of the "parallel data logs."
